

One Day Online National Seminar on
**Innovative Ideas in
Multidisciplinary Research**

26 June, 2021

Organised by
Government College, Dhaliara, Kangra
in collaboration with
Pratibha Spandan Society, Shimla & Kalp Foundation, Mandi

Welcome to One-day Online National Seminar on the theme *Innovative Ideas in Multidisciplinary Research*. The knowledge world needs a skilled squad and band of frontrunners to handle the challenges which the technological world, governments and societies around the world are facing. Most of the challenges the people are confronting currently are new and there will certainly be others likely to grow in the future which will require innovative approach and solution to overcome. Higher education institutions are no longer able to train manpower to address the contemporary and recent challenges through a single disciplinary approach. Multidisciplinary approach to research and academics is vital keystone to meet the vibrant needs of present day's higher education. This seminar shall act as a forum for exchange of ideas on the ascending avenues in interdisciplinary research. Interdisciplinary approach involves a process of responding to a query, resolving an issue, or focusing on a concern that is too broad or complex to be dealt with suitably by a single discipline or profession and integrates the interdisciplinary understanding by building of a more inclusive outlook. In the recent years, the focus of research has become interdisciplinary. It involves the systematic enquiry of trends, problems, issues, enquiries etc., to increase knowledge and understanding.

We invite galaxy of prominent scholars, researchers and students to share the innovative ideas on a common platform and present their vision on recent trends in multidisciplinary research. This national seminar is expected to initiate the collaborative ventures across diverse disciplines to serve the society in a better way. The main themes likely to be covered but not limited to the following during the seminar are:
